FERRO STATEMENT FOR CUSTOMERS REGARDING CORONAVIRUS

Ferro Corporations sources raw materials and services from a broad global base, including China. Some specific materials are more heavily sourced from China than others, based the natural occurrence of those minerals in the earth. We are aware of restrictions that have been placed on travel and shipping as a result of the outbreak of the Coronavirus in China.

At this time of year, our Planning and Sourcing function was working ahead in anticipation of the Chinese New Year holidays. As a result, we are not currently experiencing any immediate impacts due to the limitations on movements of people and goods that have been imposed by the illness, or by the Chinese government. We are investigating possible delays in manufacturing or transportation and monitoring these impacts on an ongoing basis and as the situation develops. Should we determine that any delays could affect our shipments to you we will provide that information and work together with you toward a solution.

Thank you for your business, and for your interest in Ferro Corporation.
